

ENTERPRISE WiFi SYSTEM

BUILD CLOUD WIFI WITH
YOUR OWN BRAND,
ON YOUR OWN SERVERS

TOP CLOUD WiFi FEATURES

WiFi MANAGEMENT

Centralized WiFi management of the user accounts, access limits, Internet plans. All APs are connected to a central cloud server for authentication, accounting and management.

USER LEVEL LIMITS

Assign different limits to user accounts: download, upload, bandwidth quota, expiration date. Very high customization of user accounts which allows creating limited or unlimited accounts.

WiFi BILLING

Billing with preprinted vouchers, PayPal, 70+ payment gateways... Automate billing of your WiFi service and keep 100% of the profits.

INTERNET PLANS

Define price for Internet Plan and determine download and upload speed the guest will have during the session, total bandwidth data available for transfer, optional session duration...

VIDEO ADS BEFORE LOGIN

The system can deliver video commercials before a guest connects to WiFi, targeted by age and gender. Each campaign includes the click-through rates stats, with a PDF report available

SOCIAL LOGIN

Your guest login via social network account is a quick and simple way to collect emails and your guests and visitors names, and therefore to use those data for purposes of marketing campaigns

EMAIL MARKETING

Send promo Email marketing campaigns automatically when a guest connects or leaves the premise. Set automated Email reminders to visit venues or sell products.

ADVANCED ANALYTICS

Ranging from basic data to advanced analytics, the system offers you both reports and a complete insight into how WiFi network functions and the behaviour of your guests on the Internet

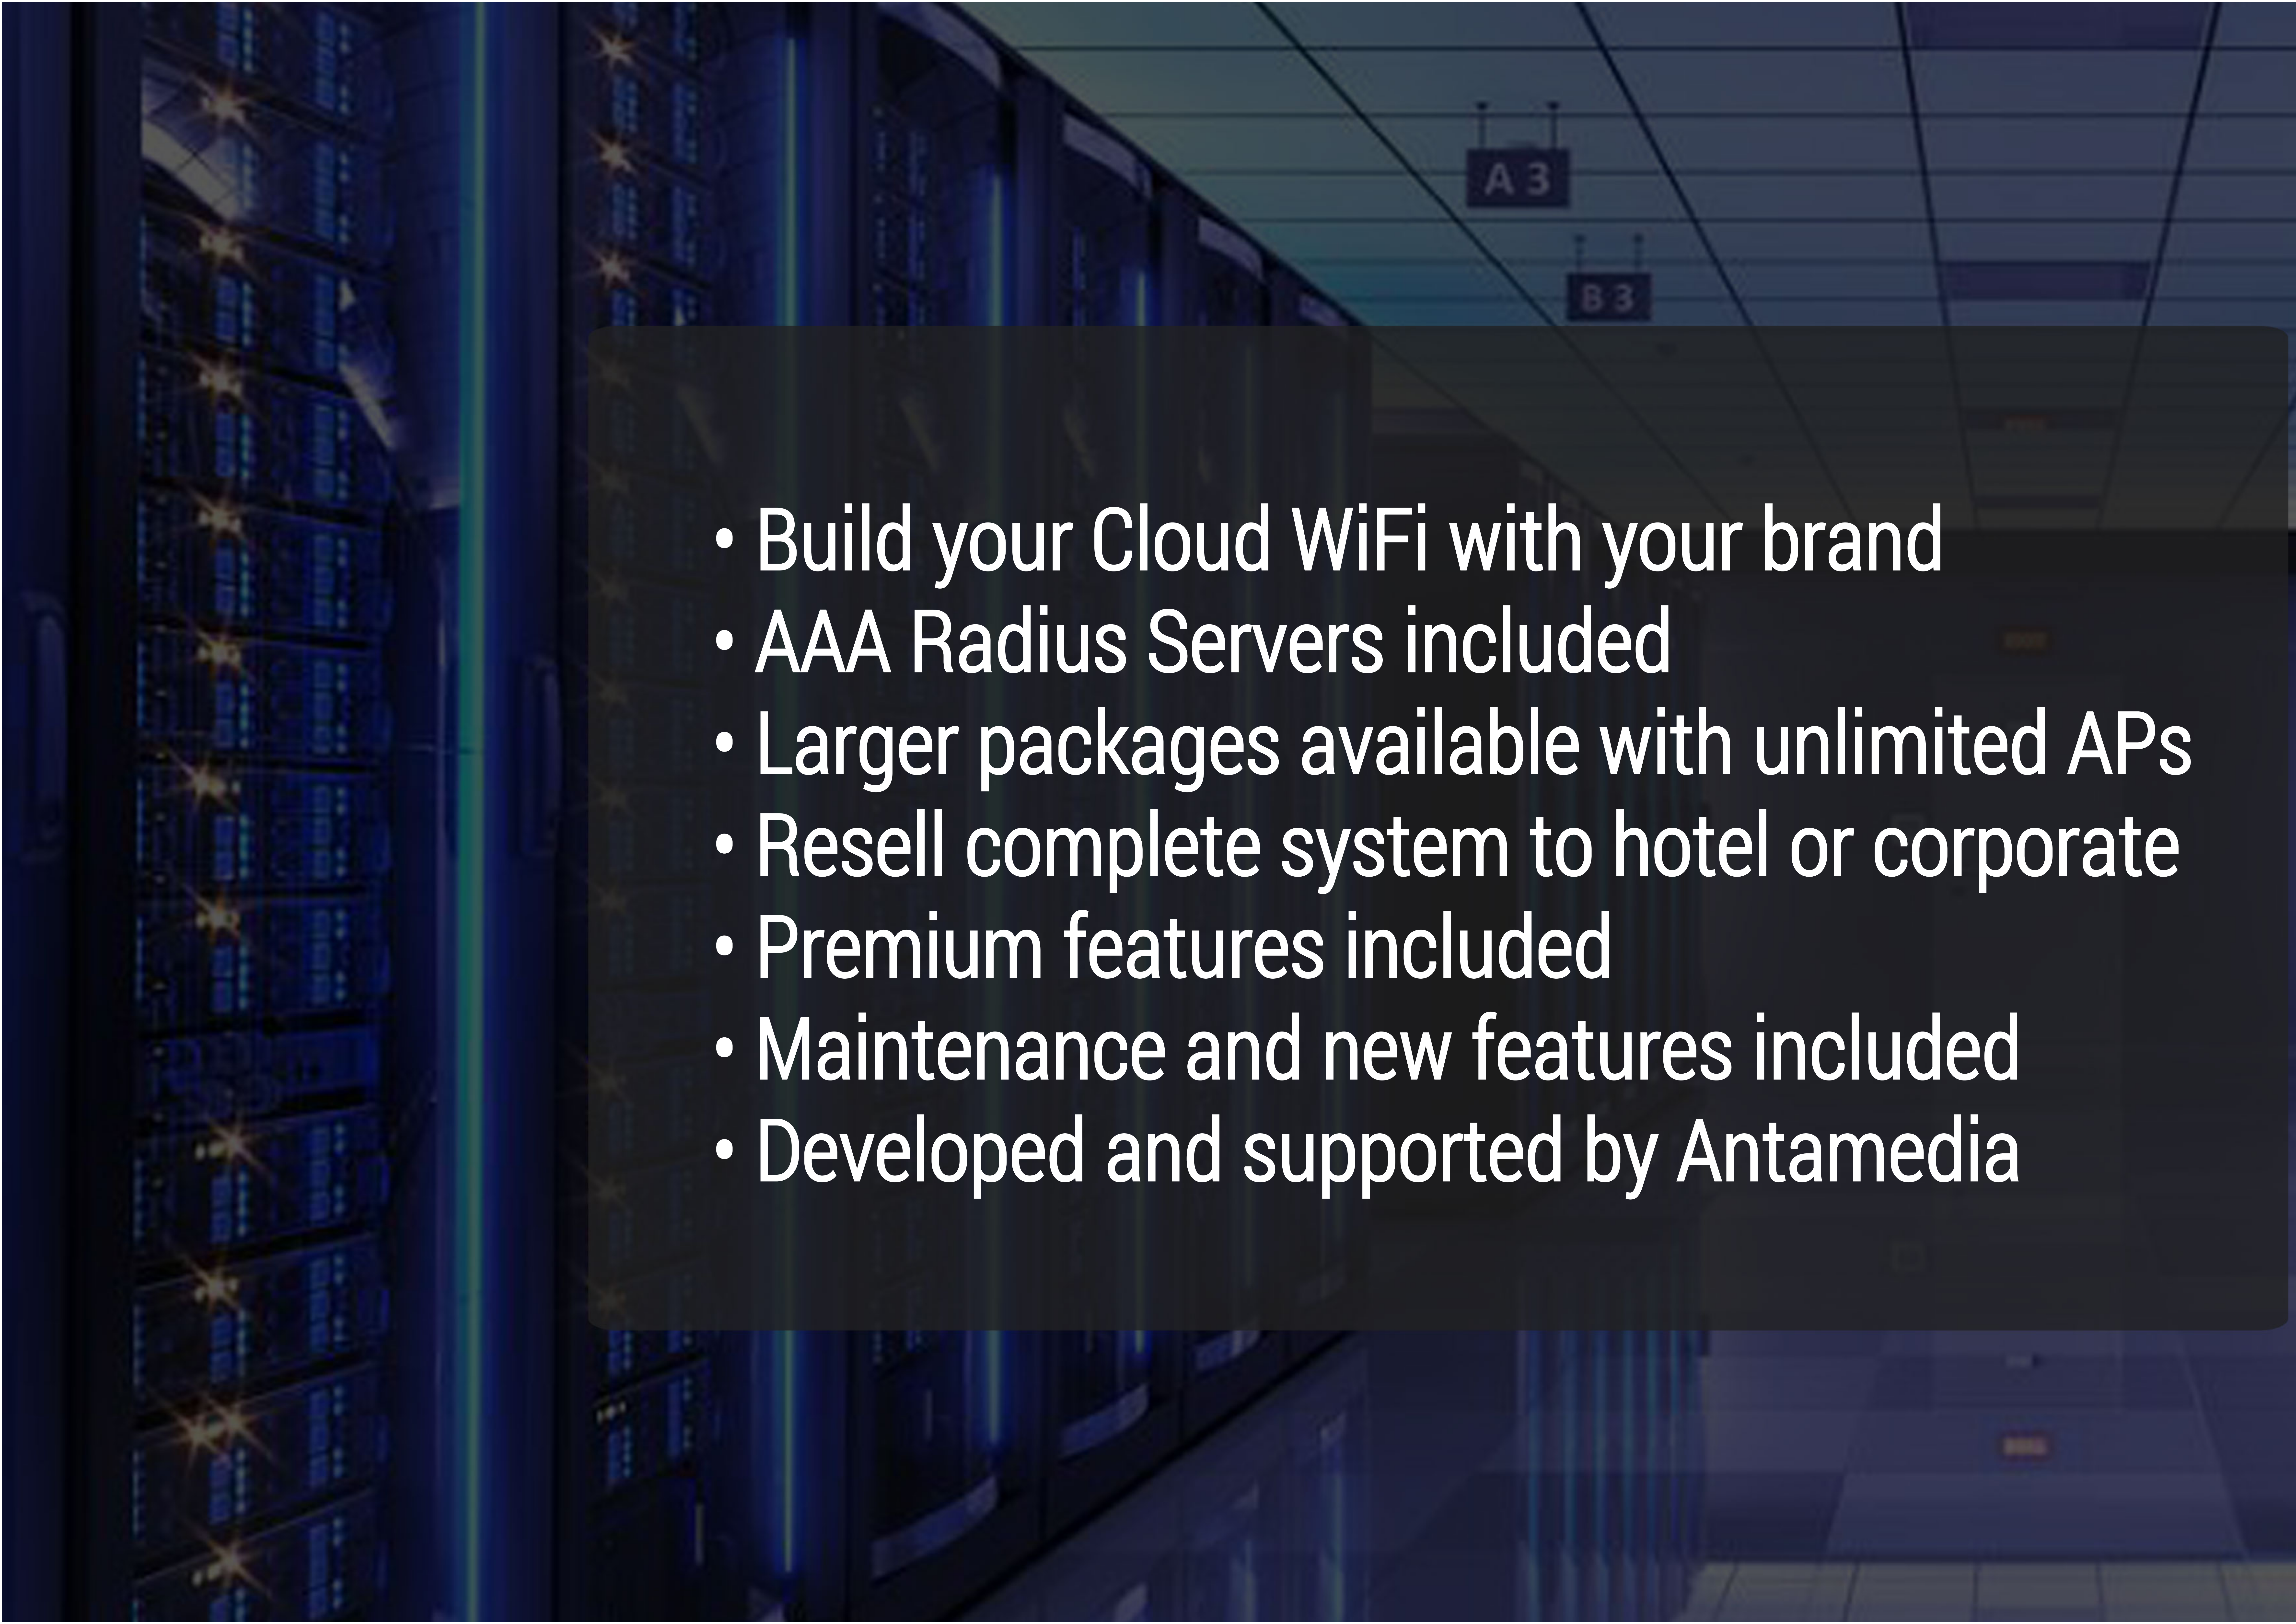

ENTERPRISE WIFI SYSTEM

is a platform for WiFi user management that can be deployed on your server or Virtual Machines.

It consists of Captive portal, AAA Radius, database, Virtual Controller server, and builds an Intelligent WiFi system.

Cloud WiFi System will be deployed on servers hosted and managed in your company, or in a cloud environment dedicated exclusively to your business.

- 
- Build your Cloud WiFi with your brand
 - AAA Radius Servers included
 - Larger packages available with unlimited APs
 - Resell complete system to hotel or corporate
 - Premium features included
 - Maintenance and new features included
 - Developed and supported by Antamedia

BUSINESSES / ISP

ENTERPRISE WIFI SYSTEM allows businesses (like an ISP) to run their own cloud-based system with all the features needed for successful customer management without worrying about technology changes.

We'll install a complete system on your server(s) or data center Virtual Machine(s) and maintain it.

The system is scalable and can be expanded in multiple servers to increase the number of Access Points and simultaneous users connected.

RESELLERS / VARs / SYSTEM INTEGRATORS

Resell complete ENTERPRISE WIFI SYSTEM to your customers, configured with their branding, desired splash page methods, pre-loaded samples (user accounts, video ads, surveys), account hierarchy levels (system admins, billing dept, front desk, location admins).

The system can be deployed in one or multiple VM, located in the cloud, or their data center.

**Earn repeated commissions
with every yearly subscription
without additional efforts**

BENEFITS

- Easy onboarding of new customers
- Assign licenses to each customer and control their access and limits
- Whitelabel so you can resell at your own price and under your own brand
- Locally hosted in server or dedicated VM
- Remotely monitor and control access points loaded with HotspotOS
- Easy WiFi roaming for customers when multiple APs are installed
- Low latency time

HOTELS / CHAINS HSIA

Deploy the industry-leading HSIA system built by professionals from 2006 and used by world-leading hospitality brands.

Install **ENTERPRISE WIFI SYSTEM** in your hotel, resort, or hotel chain.

Achieve roaming between all hotel locations with a single customer account.

System supports all major hardware manufacturers and network equipment installed in your hospitality locations.

ORGANISATIONS / GOVERNMENT

Provide WiFi access within your organisation while keeping all customer data secure in your own servers and network.

Data will not leave your network, which usually happens with all cloud wifi providers.

Configure backup methods standardized in the organisation to additionally protect from data loss..

CLOUD WiFi SYSTEM

ENTERPRISE WIFI is a system of great possibilities which connects various devices into an intelligent WiFi network. The system works on fast Microsoft Azure servers with high availability.

It provides centralized device management, WiFi network control, access methods settings, guest accounts updates, extraordinary analytics and reports, easy network expansion.

Enterprise WiFi System supports WiFi devices of the leading network brands: Cisco, Ruckus, Aruba, Ubiquiti, Tp-Link, Mikrotik, Cradlepoint, D-Link, Asus, Meraki, Icomera, Open-Mesh, etc.
