

# ISP BILLING SOFTWARE

INTELLIGENT MULTI-FUNCTIONAL ISP  
SOLUTION FOR YOUR SERVER OR VM

# TOP ISP BILLING FEATURES

## WiFi MANAGEMENT

Centralized WiFi management of the user accounts, access limits, Internet plans. All APs are connected to a central cloud server for authentication, accounting and management.

## USER LEVEL LIMITS

Assign different limits to user accounts: download, upload, bandwidth quota, expiration date. Very high customization of user accounts which allows creating limited or unlimited accounts.

## WiFi BILLING

Billing with preprinted vouchers, PayPal, 70+ payment gateways... Automate billing of your WiFi service and keep 100% of the profits.

## INTERNET PLANS

Define price for Internet Plan and determine download and upload speed the guest will have during the session, total bandwidth data available for transfer, optional session duration...

## VIDEO ADS BEFORE LOGIN

The system can deliver video commercials before a guest connects to WiFi, targeted by age and gender. Each campaign includes the click-through rates stats, with a PDF report available

## SOCIAL LOGIN

Your guest login via social network account is a quick and simple way to collect emails and your guests and visitors names, and therefore to use those data for purposes of marketing campaigns

## EMAIL MARKETING

Send promo Email marketing campaigns automatically when a guest connects or leaves the premise. Set automated Email reminders to visit venues or sell products.

## ADVANCED ANALYTICS

Ranging from basic data to advanced analytics, the system offers you both reports and a complete insight into how WiFi network functions and the behaviour of your guests on the Internet

# HOW ISP BILLING WORKS?

Upon accessing your WiFi network, the guest is automatically redirected to the ISP Billing Software self-branded login page. You can easily customize the welcome page by setting the logo and background and the ways in which your guests can access the Internet.

They may select the preferred connection method, like user/login, access-code login, free trial access or social login and start using WiFi. Once logged-in, they may be redirected to view desired website or ISP info page.

Each connected device is limited with download and upload speed, available bandwidth transfer, time to use your service, so you can ensure excellent WiFi experience for all your guests.

ISP Billing Software will control the session duration, speed and bandwidth, and optionally collect your guest e-mail, name, address, for your safety and info marketing activity.

# IDEAL ISP SOLUTION

ISP Billing Software provides you with both advanced WiFi network control and a reliable connection with all users.

Track your customer's behaviors, analyse the demographics and habits of your clients, display location-based ads or fully-featured Email marketing campaigns that target customers by age, gender and interest.

It enables you to deliver video commercials and automatically sends special offers at defined time intervals, which leads to an increase in revenues from restaurants, hotels, retail stores and other services.

Improve your business and attract new customers by installing an intelligent ISP Billing solution on your server and implementing it in your WiFi network.

# RESELLER PORTAL

Increase profits by recruiting resellers and make them sale partners for your Internet service.

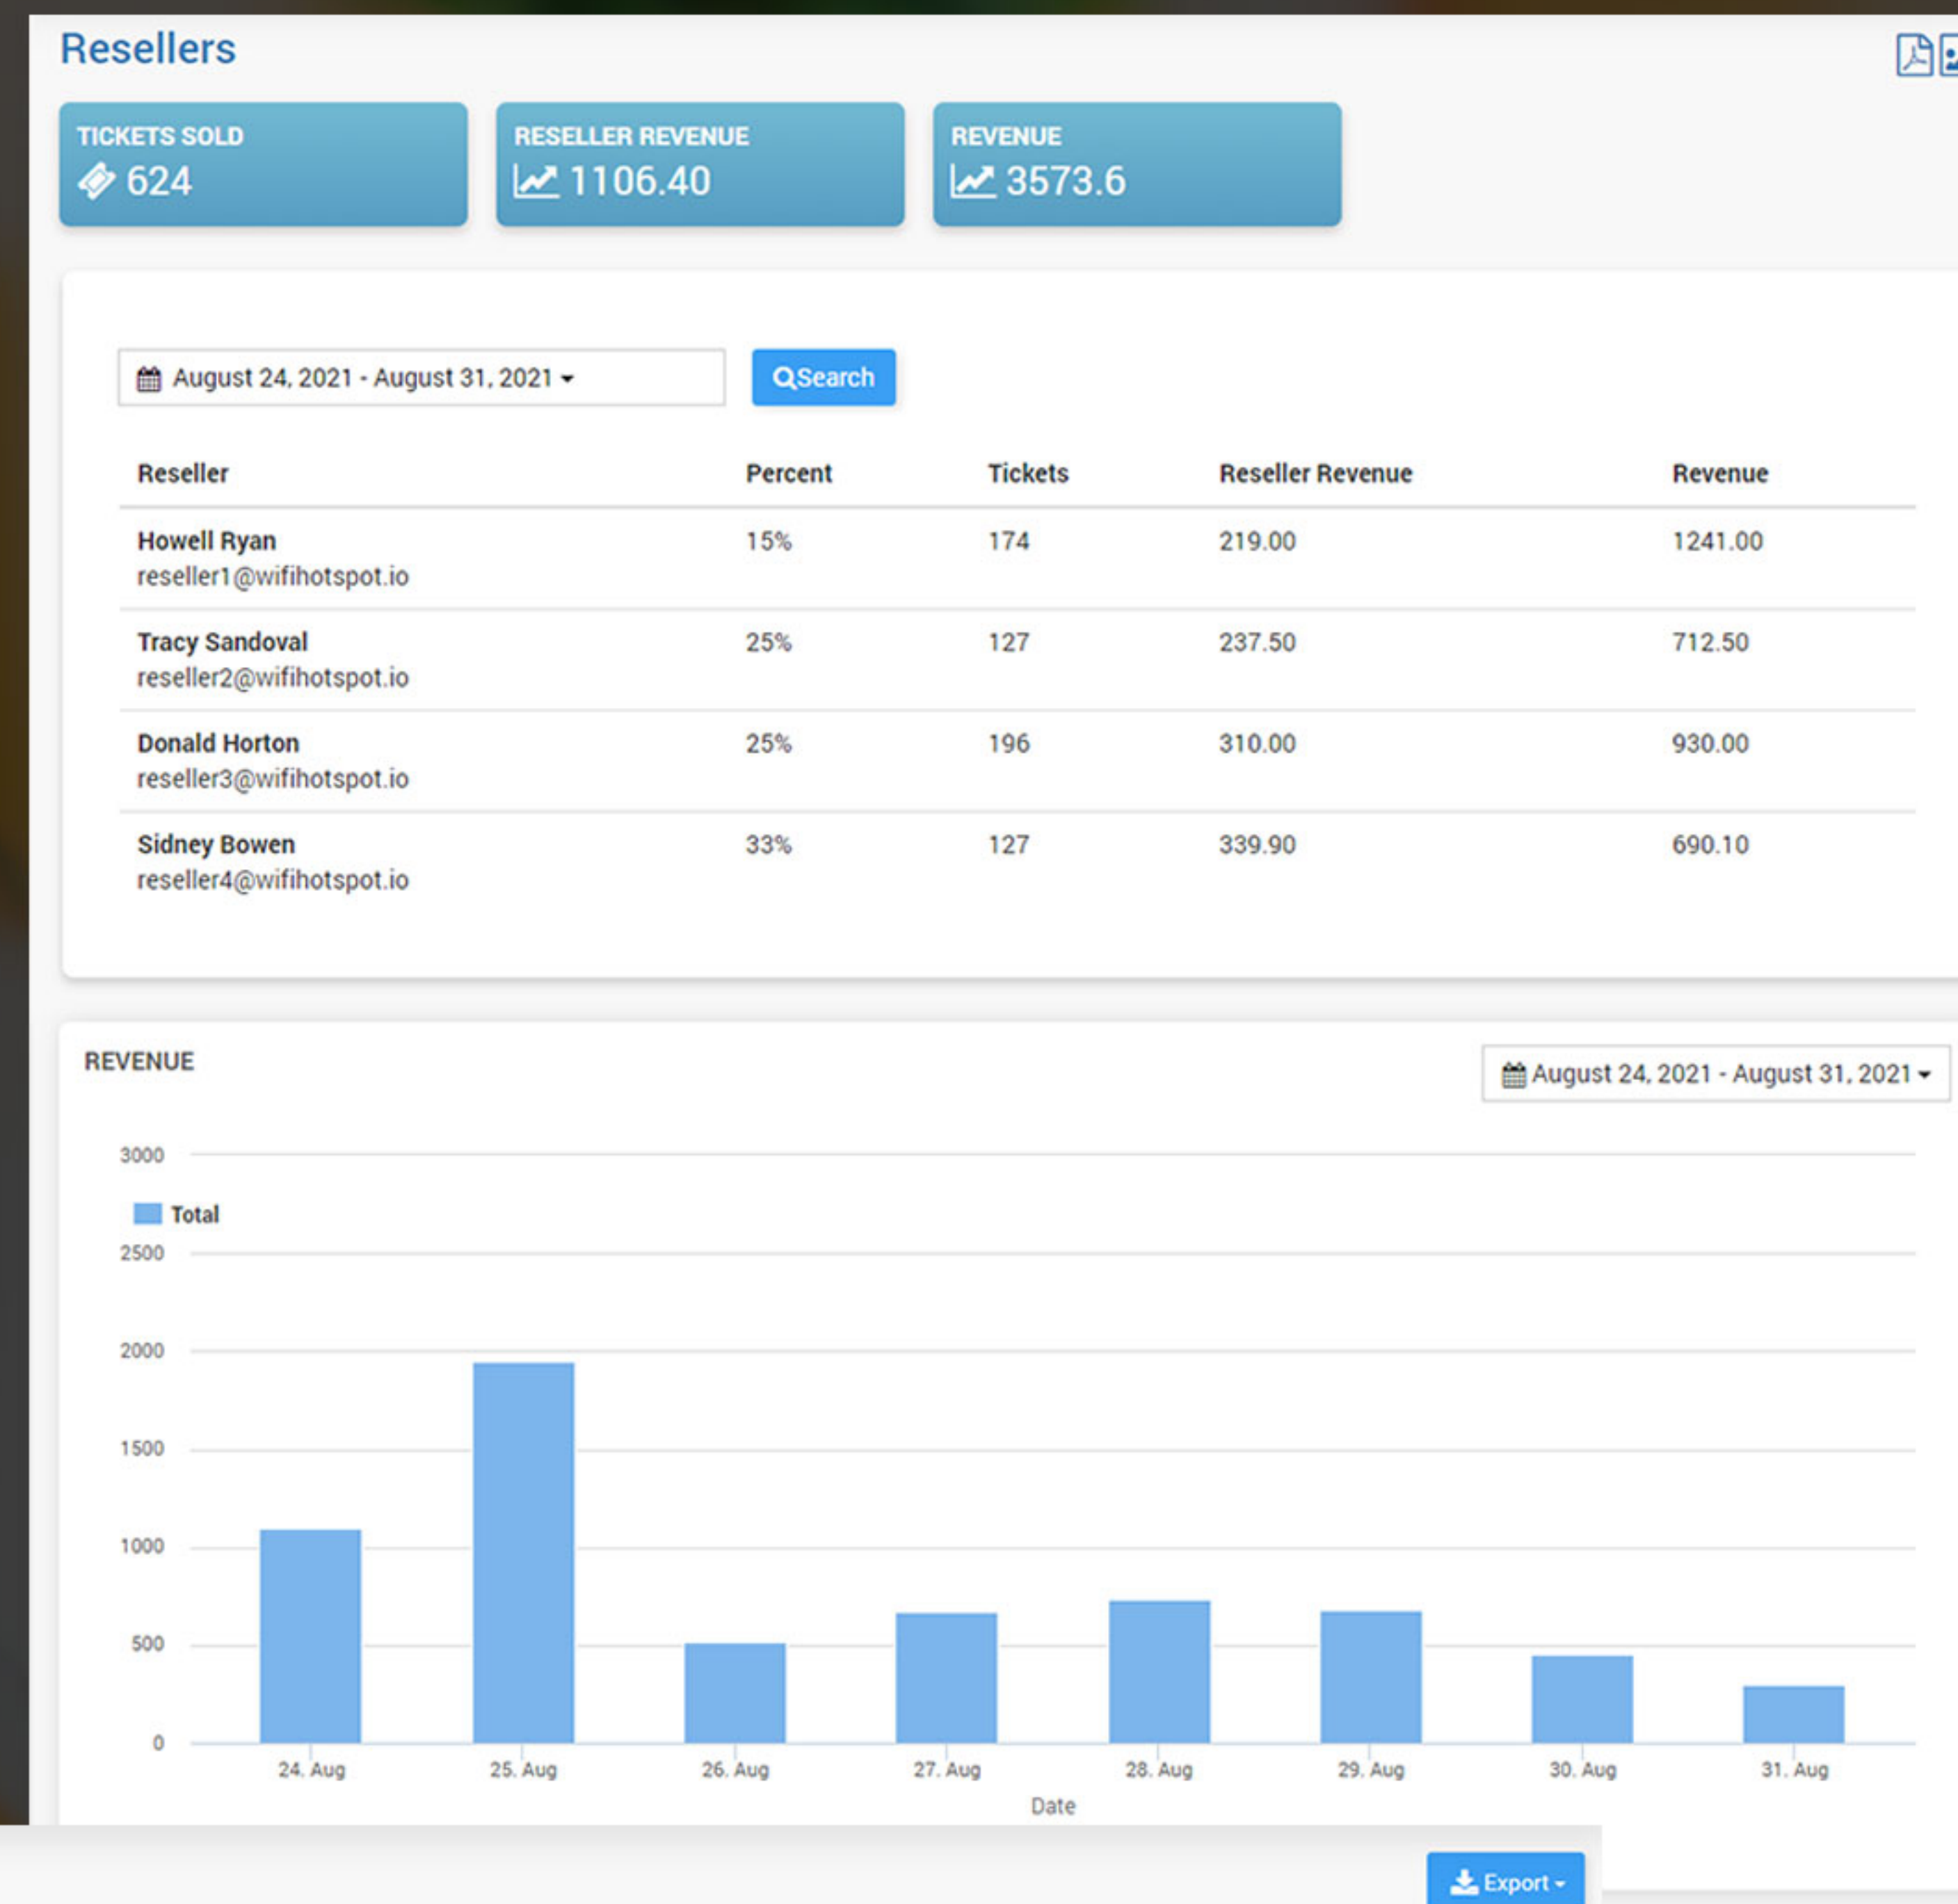

Every reseller becomes a sales point and provides WiFi tickets to nearby customers.

Your resellers may create and sell tickets using the WiFi Tickets App for their Android phone or using the Android Device with a printer.

Tickets are assigned to your reseller and every sale is recorded in the system.

Resellers are credited for the reseller percent which you can customize for each reseller.

You will be able to monitor resellers activity directly from your ISP Billing Software web portal.

# WiFi TICKETS APP

WiFi Tickets App helps you print tickets for your guests, visitors, and users to connect to your WiFi network.

It can be used at multiple locations within a business: kiosks selling newspapers, shops, places within a hotel like a restaurant, reception, lobby, pool, beach...

Your resellers may use WiFi Tickets App to create & sell tickets for customers.

WiFi Tickets App can be used at hotels or airports to scan a passport and create a WiFi ticket.

# VOUCHER LOGIN & COLLECT DATA

Create vouchers with desired price plan limits: bandwidth quota, download and upload, time, daily and monthly limits, expiration, number of devices per account, day time schedule.

Distribute voucher tickets through your channel partners or sell them by your staff or resellers.

Software includes reseller portal where you can signup multiple resellers and assign them sale percent. Every reseller may create and sell vouchers in several ways: Through the portal, using mobile app, or using Android printer app. Every sale is recorded in the revenue report, with real-time payments log.

Splash page may request from customer to enter personal details, like name, email, phone. You can use it in your email marketing campaigns and to send automated scheduled promotions.

# CREDIT CARD BILLING

Credit card processing option is very important if you want to automate your business.

It helps you to save time and resources by allowing the customer to create and pay for network access directly from their device.

Visitors who are willing to use your services can sign up for username and password, choose an Internet plan and pay with their credit card.

The processing occurs within seconds and your customers are able to continue using your services.

Stripe allows automatic customer billing and Internet plan renewals.

# WiFi REVENUE

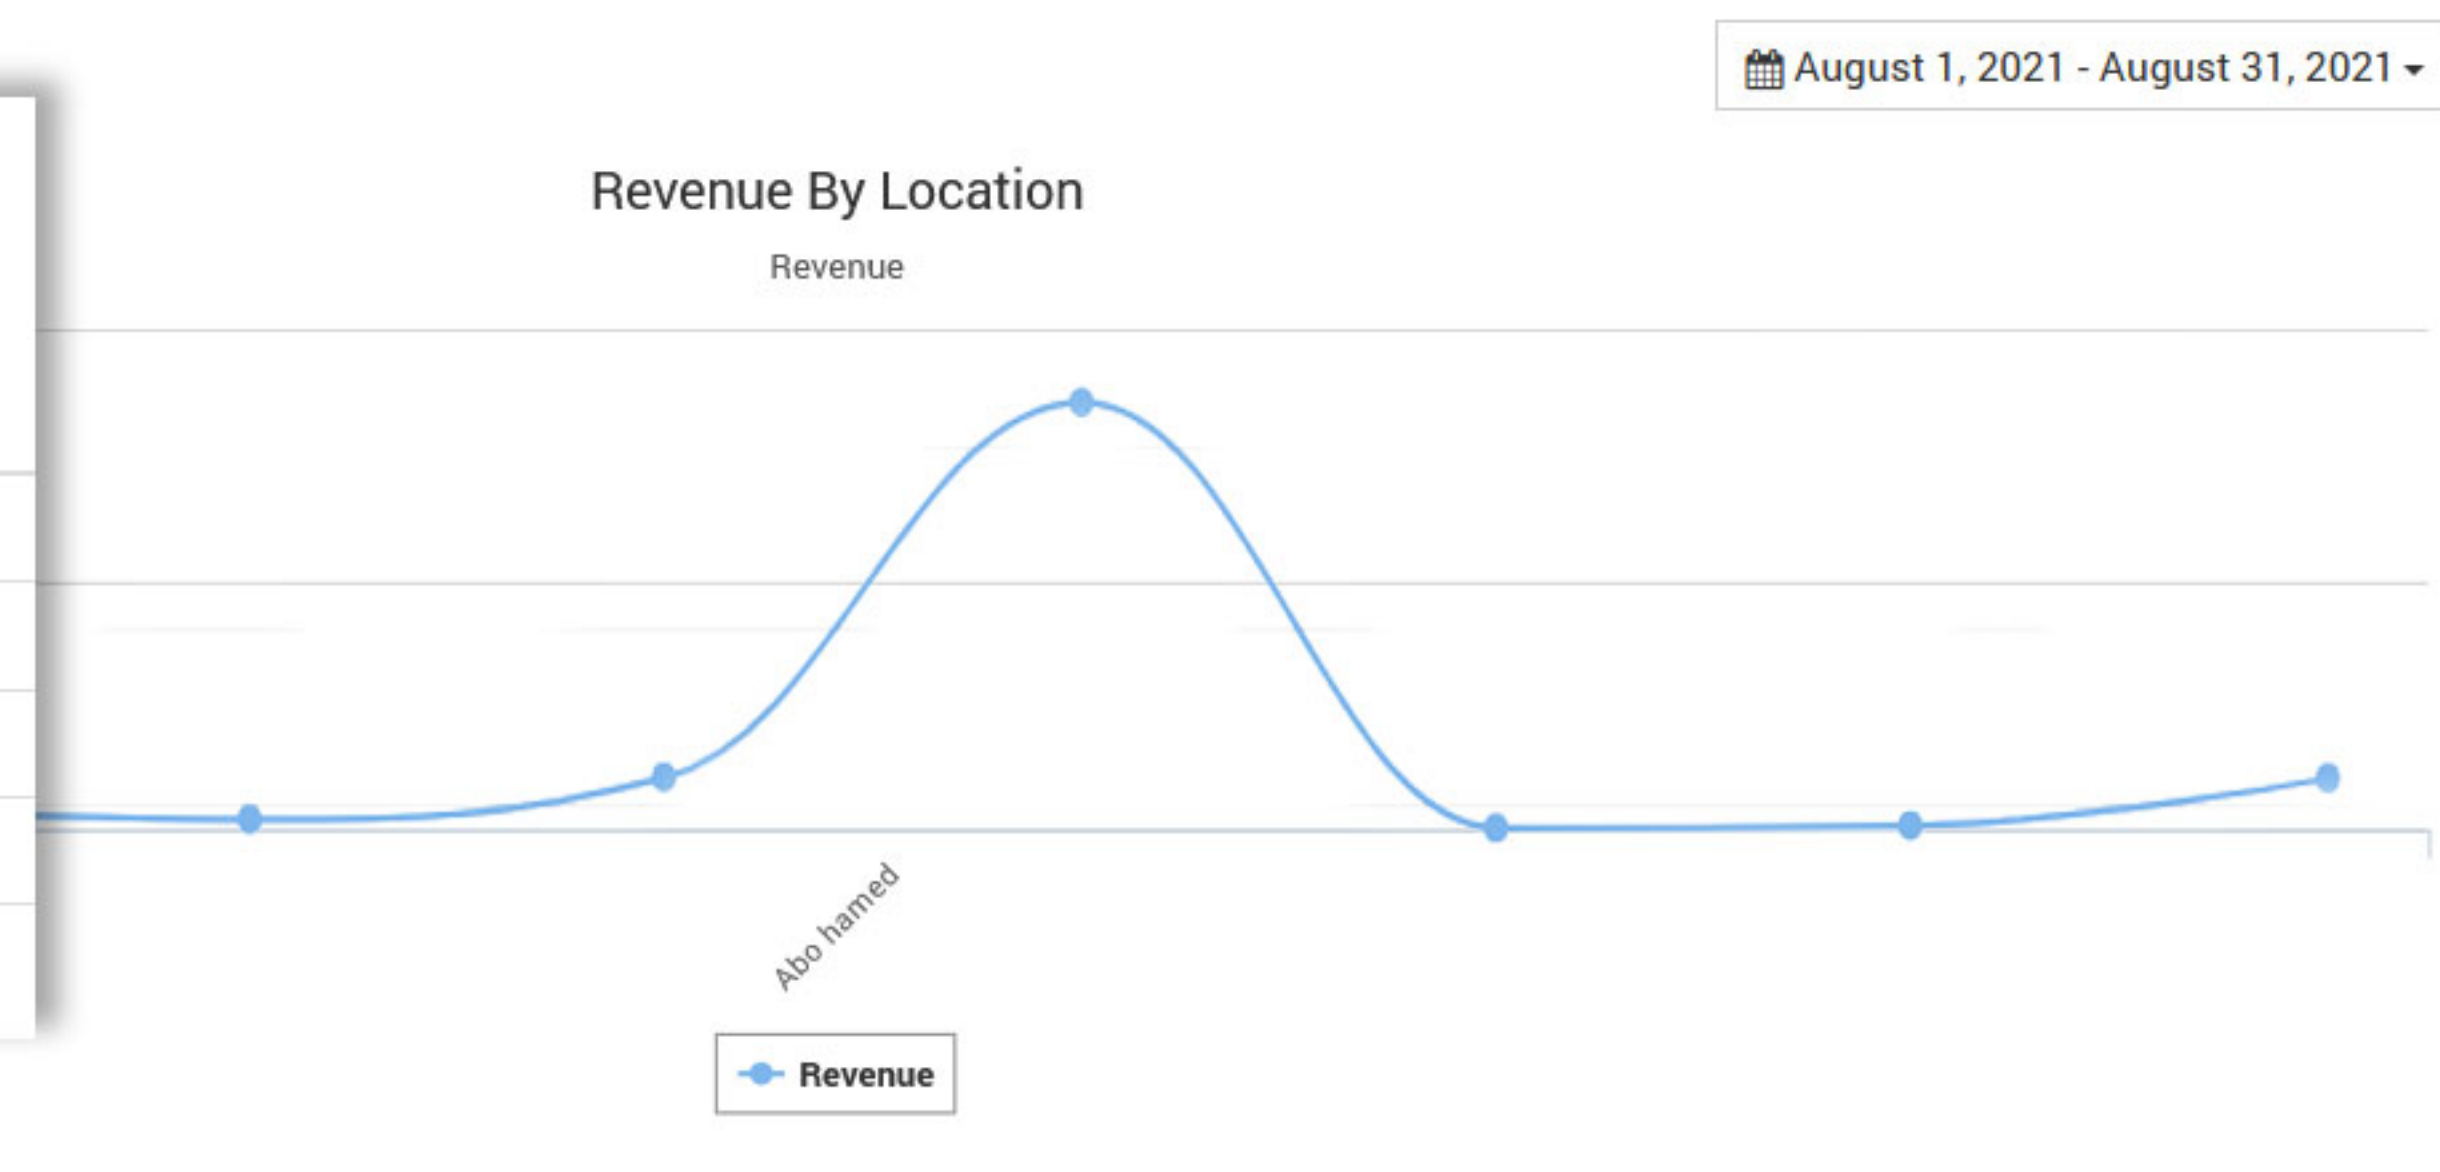

Get Revenue list with the revenue data based on WiFi location and date for the selected time period.

Acquire daily, monthly, yearly or custom range Revenue reports and based on them check your business results.

Based on Location and Revenue date interval you will get WiFi Location Revenue list with the revenue data based on WiFi location for the selected time period.

Location		Revenue date	
All		September 16, 2021 - September 23, 2021	
		<a href="#">Search</a>	
Location Name		Revenue	
Hotel Palms		132000.00	
Hotel Beach		168800.00	
Restaurant Beach		54500.00	
Cafe Dream		174630.00	
Total		529930.00	

# USER PROFILE

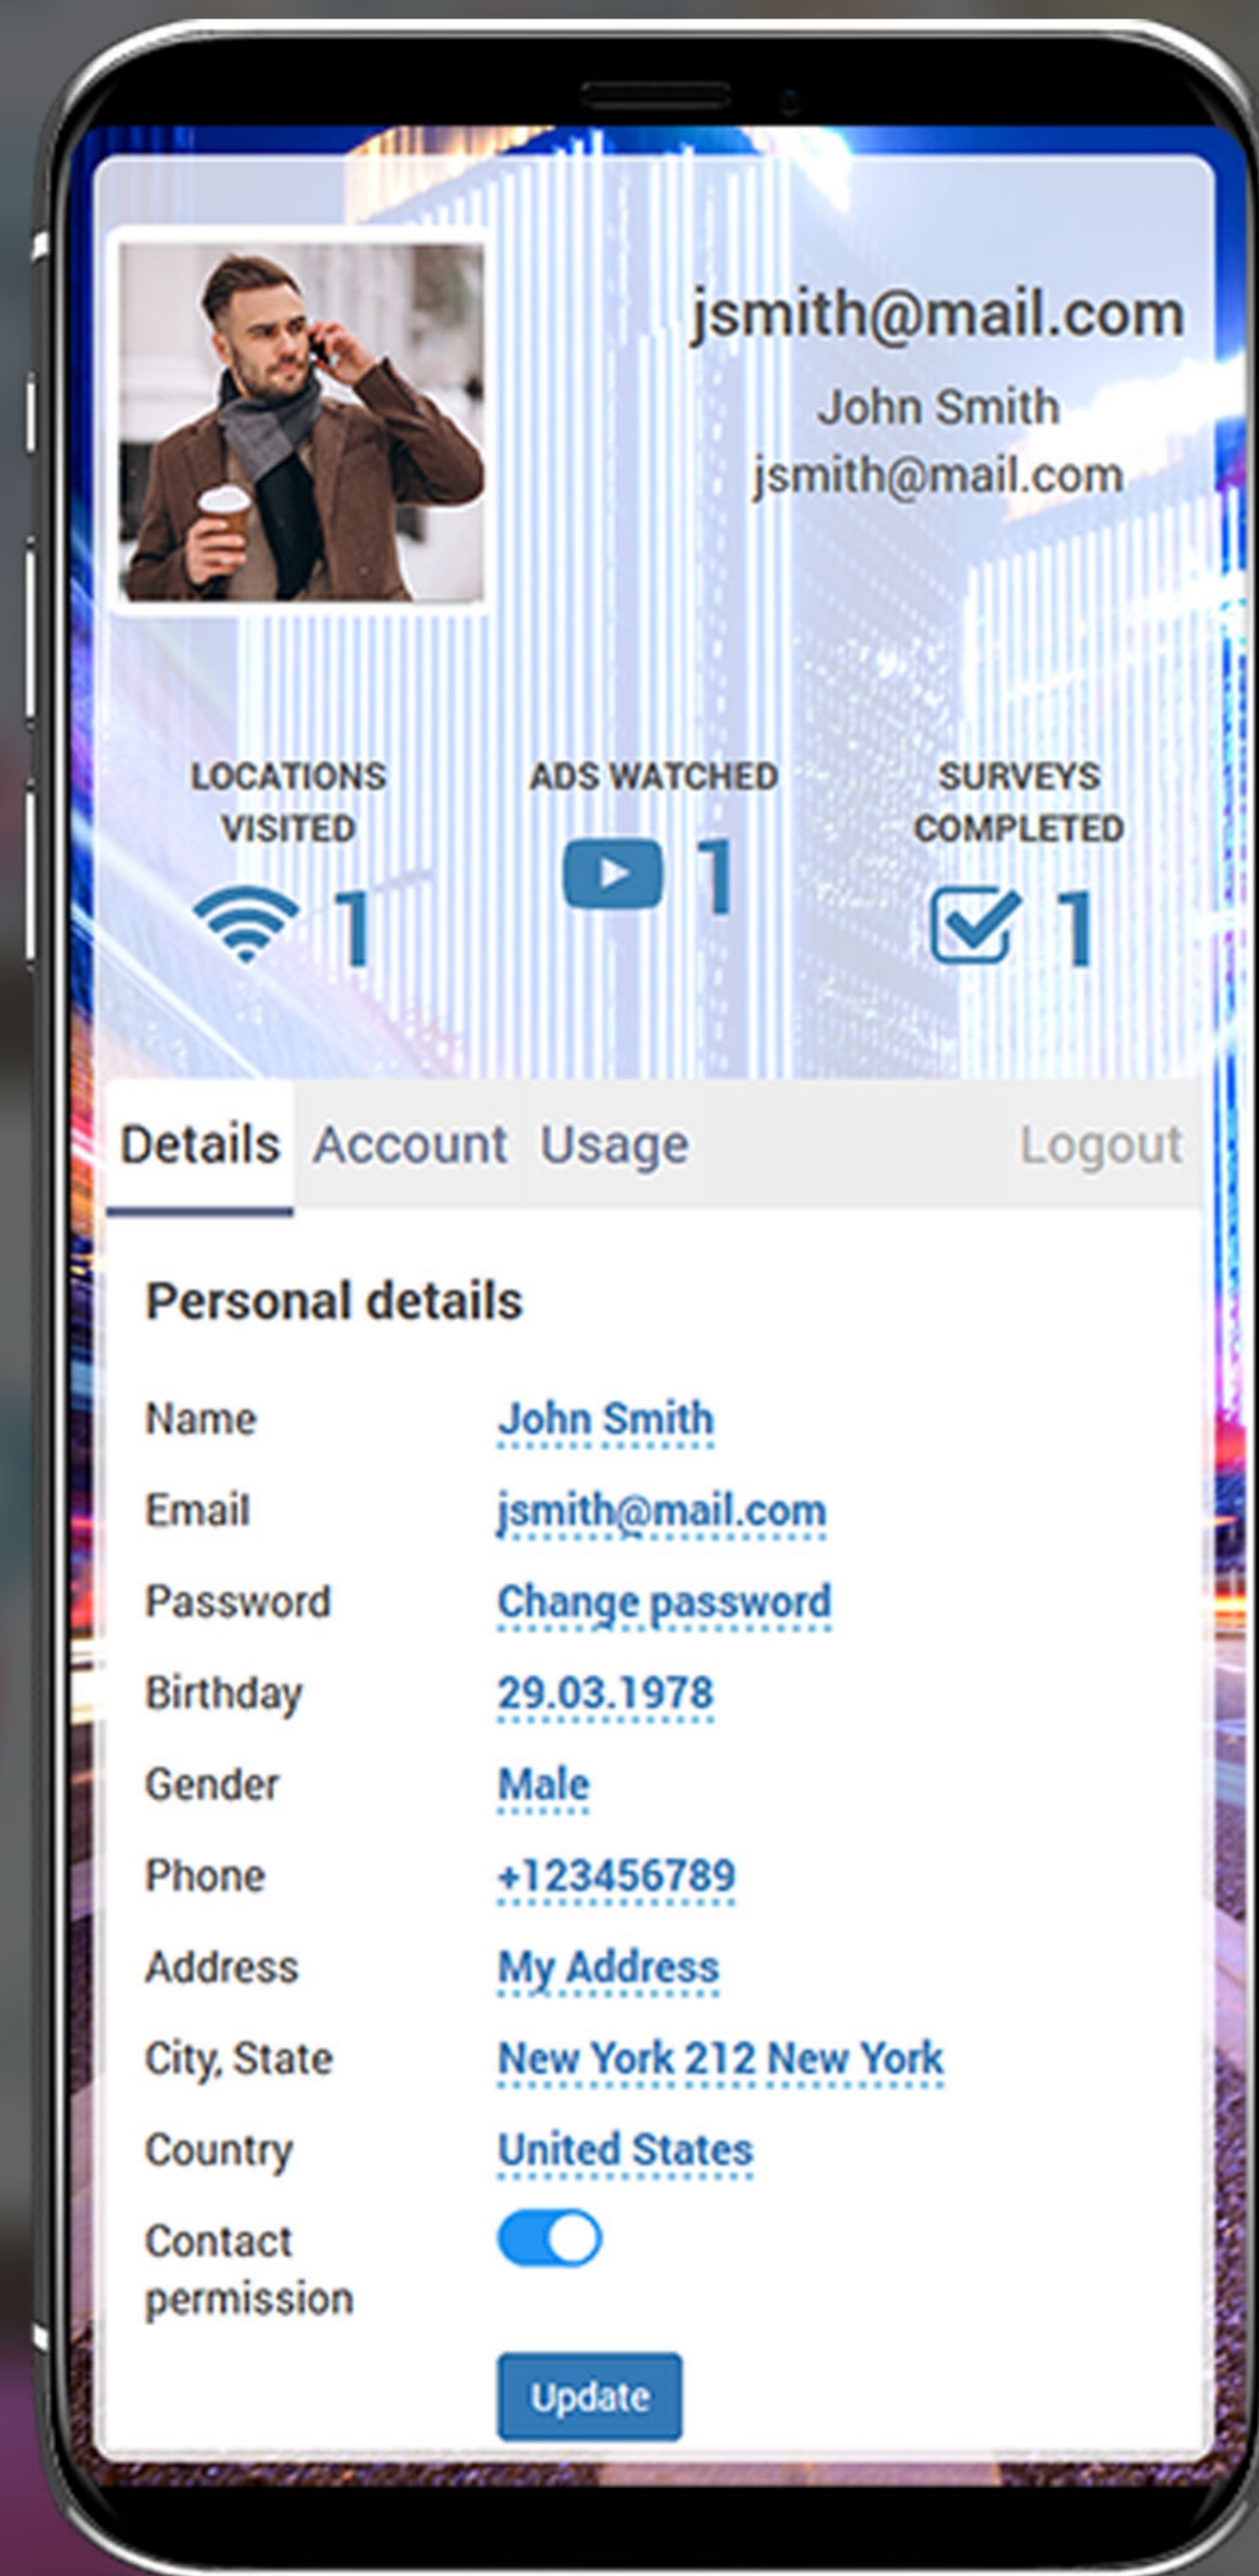

User Profile contain customer personal information and it's a valuable addition to the rest of the user account options.

ISP Billing Software goes beyond the usual personal data collection and provides an option to save customer photo, gender, birthday, etc...

This is especially useful in the countries with anti-terrorism laws, where all users have to provide identification document.

Let end-users manage their own consent and personal data according to GDPR.

Opt-in/Opt-out for personalized message.

ISP BILLING SOFTWARE

WiFi Network

ISP Billing Software has an advanced architecture which allows both simple and very large networks.

Install ISP Billing Software on your server, in your data center, dedicated cloud environment or VM, start offering WiFi services and grow slowly by adding new access points, connect different city areas, one step a time.

Easily integrate several separate WiFi networks in one large network, where all accounts are served from the central database, located on your server.

Flexible architecture makes ISP Billing Software suitable for different implementations like ISP city / country wide networks, hotels, shopping malls, bus/train stations, airports, etc ...

## You will benefit from:

Lower costs

Additional revenue from video advertising

Excellent personalized support

Short time to switch over to our platform

Scalable system with virtually no startup cost

# ISP BILLING SOFTWARE

ISP Billing Software is a system of great possibilities which connects various devices into an intelligent WiFi network.

The system will be installed in your data center, or in a dedicated cloud environment. There are no appliances.

ISP Billing Software provides centralized device management, guest WiFi network control, access methods settings, guest accounts updates, extraordinary analytics and reports, easy network expansion.

It supports WiFi devices of the leading network brands: Aruba, Cisco, Ruckus, Ubiquiti, Tp-Link, Mikrotik, Cradlepoint, D-Link, Asus, Meraki, Icomera, Open-Mesh, etc...

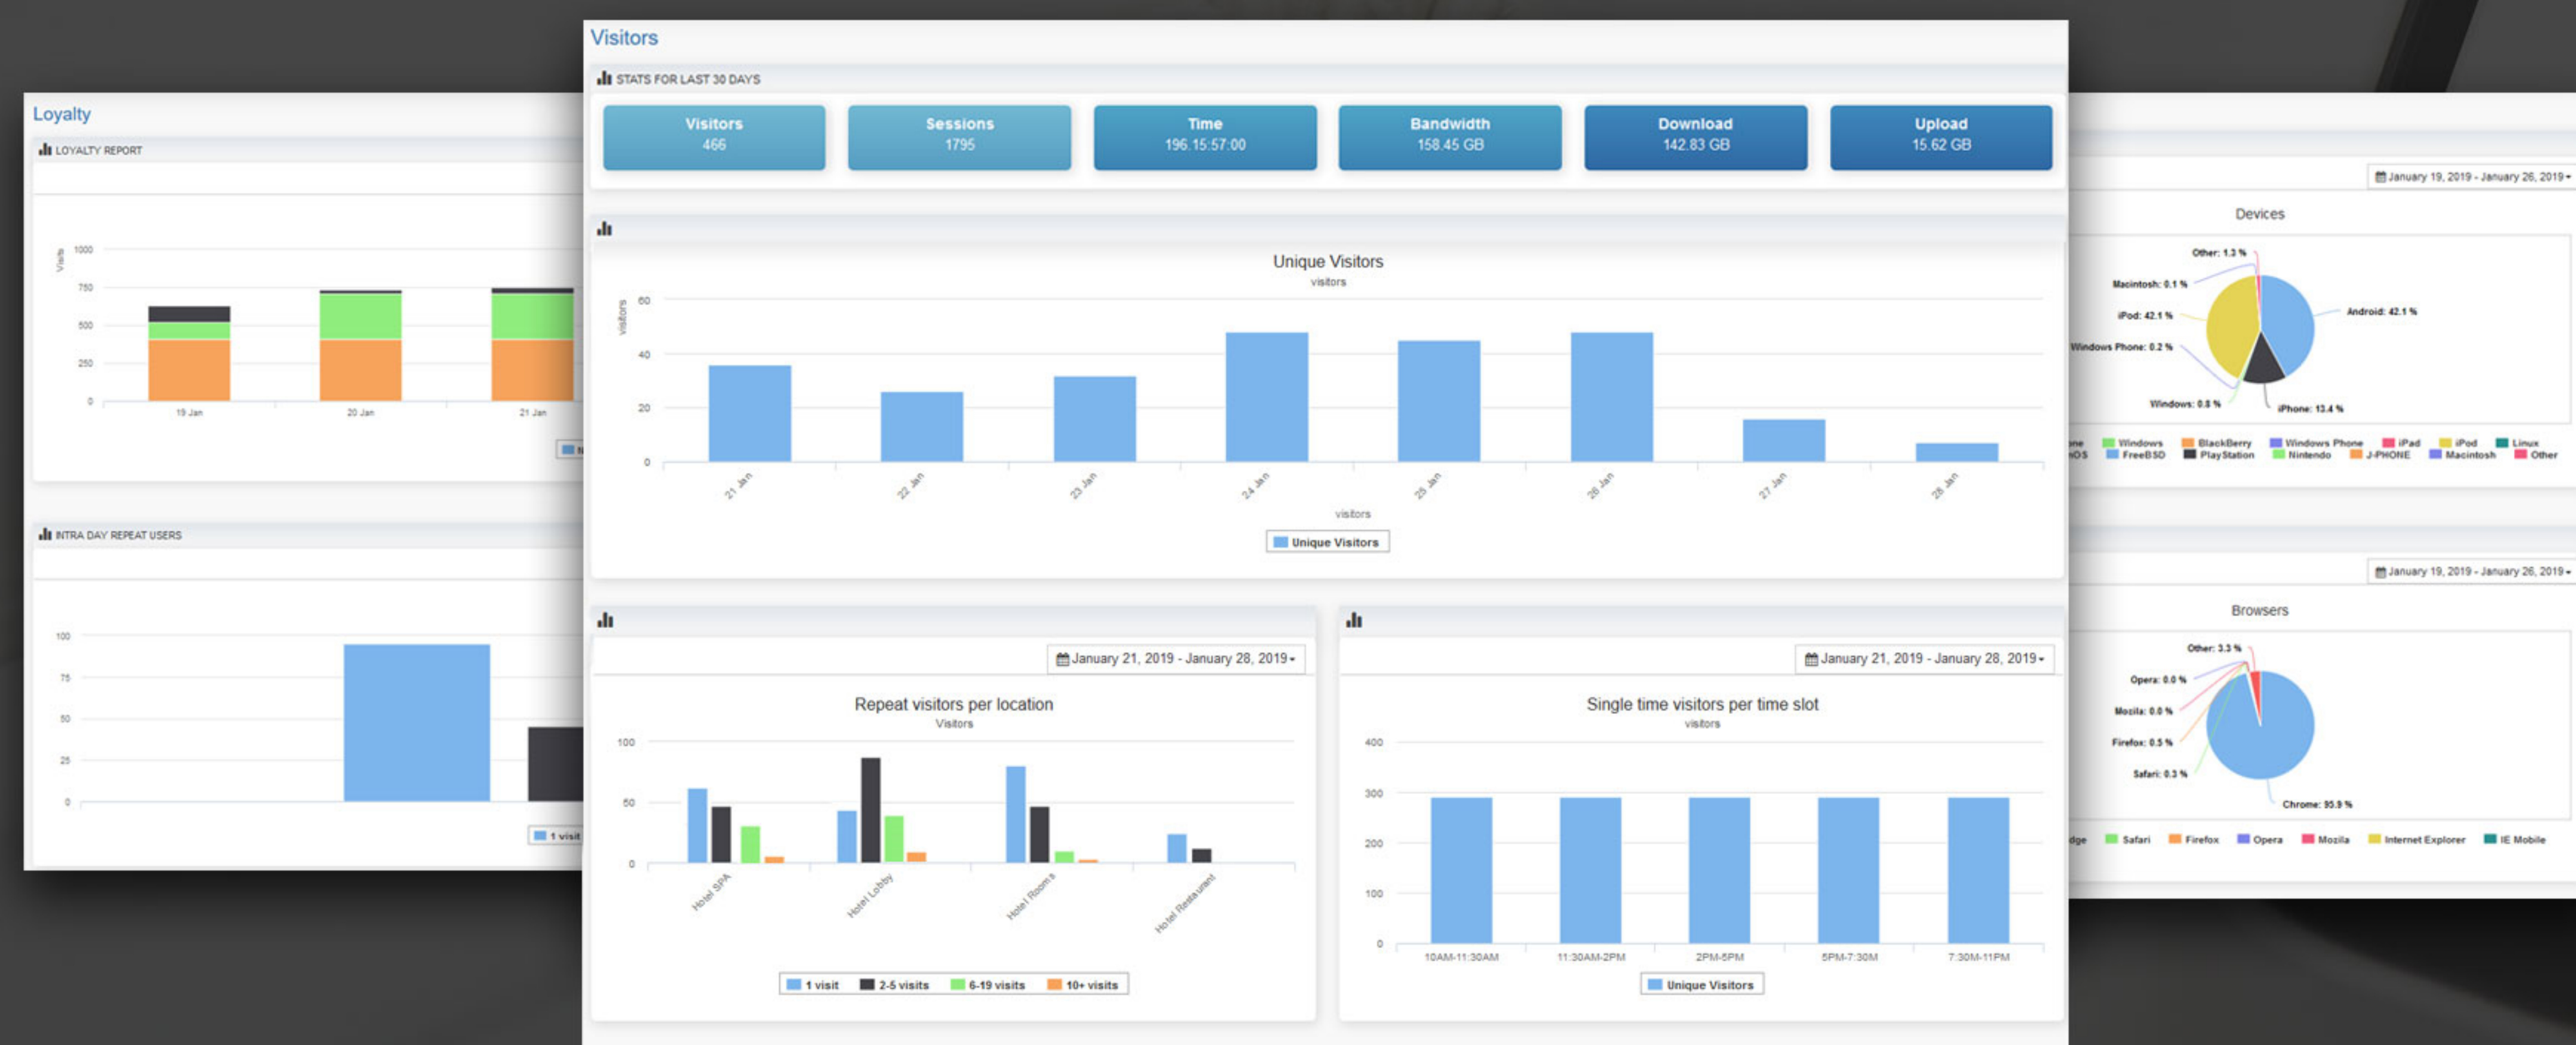

# ADVANCED ANALYTICS

Ranking from basic data to advanced analytics, ISP Billing Software offers a thorough insight into visitors behaviour.

Get to know your visitors, find out what their habits are and prepare effective marketing campaigns.

Track Internet usage, set the limits to Internet plans, or set specific limits to individual users.

Visitors statistics have been divided into multiple reports which include loyalty, top users, time intervals, sex, age, and other demographic data.

# ABOUT US

Antamedia software company has been developing software solutions and specialized solutions for both small and middle-sized businesses since 2001.

We initially helped entrepreneurs realize their goals and start their own businesses, and nowadays we give support to our biggest business clients as well.

Antamedia was a pioneer in WiFi software business in 2006 and since then we have expanded the list of solutions for WiFi control with Android and Cloud innovative solutions.

ISP Billing Software is a next-generation intelligent WiFi system which improves WiFi network and boosts customer satisfaction.
